WHY DOES YOUR DOG NEED PREVENTIVE CARE?

Regular preventive care is essential for your adult dog's continued health. Our wellness plan saves you money on the total cost of recommended preventive care and treatments. Best of all, this plan features budget-friendly monthly payments - making it easy to manage your dog's healthcare costs.

Vaccinations help healthy dogs stay healthy

Your veterinarian will recommend the vaccination protocol that is most appropriate for your dog based on lifestyle, breed and other important factors.

Diseases can creep up quickly and quietly

Dogs age much more rapidly than we do. So even if your dog looks perfectly healthy, illness and disease could be lurking undetected. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.

Prevention is the key to better health

Preventive care can improve your adult dog's quality of life and help add more healthy years. It's essential for detecting diseases early on, before they become more serious - and more expensive.

Dental Health is important

Almost every dog will develop some degree of dental disease in their lifetime. Poor dental health results in chronic pain for your pet and can lead to kidney, liver, and heart disease. Regular dental cleanings and evaluations are an important step to help your pet lead a healthy, happy life. **Digital dental x-rays will help find painful tooth disease that is hidden below the gums.**
