You Save Over \$857

WHY DOES YOUR CAT NEED PREVENTIVE CARE?

Regular preventive care is essential for your adult cat's continued health. Our wellness plan saves you money on the total cost of recommended preventive care and treatments. Best of all, this plan features budget-friendly monthly payments - making it easy to manage your cat's healthcare costs.

Cats are really good at hiding illness

It's a common misconception that cats don't get sick. In fact, cats are susceptible to many forms of disease - regardless of whether they live indoors or outdoors. Regular veterinary care can help stop illnesses before they happen.

X-Rays, Blood pressure and EKG can help find heart and other disease early

Cats age much faster than we do. So even if your cat looks perfectly healthy, diseases and health problems could be lurking undetected. X-Rays and EKG provide a look at what's going on inside your pet and can detect a health problem before your pet becomes ill.

Prevention is the key to better health

Preventive care can improve your adult cat's quality of life and help add more healthy years. It's essential for detecting diseases early on, before they become more serious - and more expensive.

Dental Health is important

Almost every cat will develop some degree of dental disease in their lifetime. Poor dental health results in chronic pain for your pet and can lead to kidney, liver, and heart disease. Regular dental cleanings and evaluations are an important step to help your pet lead a healthy, happy life. **Digital dental x-rays will help find painful tooth disease that is hidden below the gums.**
